

Summer Program has been having fun “seas”ing the day this summer! Each week we are learning about a different one of the seven seas. We took a trip to the planetarium to learn about how Mars is similar to the Arctic and this week we went to Elm Bank to learn about plants from Asia, and the Zoo to see some animals that live in Asia while we learned about the Indian Ocean. In the next few weeks we will be going on a tour of Fenway Park, learning how chocolate is made, watching how blown glass is created and visiting a Pirate Museum and Battleship Cove. In addition to our awesome trips we have been loving swim lessons every morning at Rosemary and going to Free Swim three days a week!
